# ZERO BREAK DOWN
SOLUTION

z A complete system for maintenance team.

Why this system?

Are you looking for a system which is efficient in searching spare parts when breakdown occurred ?

Are you looking for a system which is easy the process of indenting and reordering of spare parts ?

Are you looking for a system for breakdown analysis, reporting and graphs ?

Are you looking for a system which is efficient in managing preventive maintenance task ?

Are you looking for a system which calculates part life, machine efficiency, scheduling activities, KPI reports ?

This Software is made for filling the need of the Production Engineering team of your manufacturing unit.

Zero Breakdown Solution can lead to better outputs that may benefit the company...

- User friendly design.
- Helps in maintaining spare parts inventory through Barcodes scanning.
- Helps in preventive maintenance planning and executions, breakdown noting and analysis.
- Data is safe, secured and centralized.
- Save the time and money in maintenance.
- Identify the spare part life cycle, Machine/subpart MTTR and MTBF through graph analysis
- Helps in maintaining budget properly.
- Generates KPI report.
- Helps in preparation of counter measure plan and preventive maintenance task.
- Helps in reordering and indenting of spare parts.
- Identify and analysis of Machine/subparts efficiency and performances.
- Helps in analysis of technicians performances.
